This building appears on the September 1944 base map as building 421 and should likely be so designated. Depictions and descriptions of #421 are absent from most primary source materials, perhaps because it was built later than most of the other buildings. However, the December 1945 "Schedule of Buildings, Cantonment and Housing Areas" describes #421 as having a "new number" and as being nonexistent earlier. The construction date is probably 1944.

The building, as described in the 1945 "Schedule" is built off plan W.B. 65-3 (prepared by the Salt Lake District Office). It is 20 feet by 72 feet in size. The building's actual and subsequent uses have not yet been verified. The presence of numerous roof and walls, and the scarcity of windows and doors, suggests some kind of equipment or utility use. More research is needed to determine historic uses. No building card (cards with building data for Wendover A.F.B. structures are located at Hill A.F.B.) was found for this structure.
